

Our Sustainability Goals for 2025

At Mawe Lodges, we are committed to reducing our environmental impact, supporting the communities around our properties, and promoting responsible tourism.

In 2025, we have implemented a number of new initiatives throughout our operation to help us achieve our sustainability goals, focusing on reducing greenhouse gas emissions and protecting biodiversity. We encourage our valued guests, staff, and visitors to support us by following the reminders we have provided throughout the camps and lodges about saving water and energy, as well as minimising waste.

For 2025, our key goals include:

- Reduce food waste by 5%
- Reduce landfill waste by 5% through recycling initiatives
- Reduce hazardous substances by 20%
- Reduce water usage by 5%
- Support children with back-to-school packages through The Dove Foundation
- Raise awareness and provide training for all team members

We believe that small, consistent actions make a big difference – for our environment, our guests, and the local community.
